

THE FLU IS HITTING MARYLAND HARD.

PREVENT
THE SPREAD
OF FLU

It Starts With You

**CLINICAL PROVIDERS
ON UM UCMC CAMPUS:**

For the safety of everyone, we have increased visitation limitations this flu season on both of our campuses. Since the UM UCMC campus has many access points to our hospital, we ask that you make your patients aware that children under age 18 will not be allowed access to our campus unless the child has a medical appointment.

Thank you for leveraging expectations with your patients and for helping to prevent the spread of flu this season.
